Vice Chairman's Desk:

Greetings to all my students and faculty!

In these uncertain times of a lockdown I wish you and familykeep safe and well! We at Sri Vishnu family take pride in your wellbeing and purpose as a learner and teacher.

The Principals, Department Heads and faculty have undertaken a lot of measures in ensuring a continuing learning environment is made available to our students. Each institution has devised their own online learning strategy using tools like Zoom, Google Hangout, Google Classroom, Skype, WhatsApp, YouTube, email, eLab, Nasscom Future Skills, and many other tools to enable you to become digitally connected. The content and assignments have been meticulously designed by our expert faculty with the intention that SVES students should not feel, unattended to, during this time of isolation and social distancing. Chairman of SVES has personally sent out many interesting links like the"Teaching Professor" ,https://www.teachingprofessor.com/covid-19/a-memo-to-students-on-punching-through-the-pandemic/ , https://www.teachingprofessor.com/covid-19/teaching-in-troubling-times/ to help both faculty and students engage online in a meaningful way.

Our alumni is a biggest source of strength and I urge the faculty who are personally connected with the alumni to reach out and bring their perspective on how students should be better prepared for their future. Your participation in various hackathon events, onlinecompetitions that are broadcasted through your departments from time to time, and presenting your ideas online for hardware projects in mechanical, Electronics, Robotics, and Civil on such forums like https://www.lafondation3ds.org , and such other unconventional engagements online, will certainly help you be differentiated and smart at the workplace. Certifications for your skills are important for companies to look at your profile differently. Using this time wisely and doing microcredits online with "Coursera for campus", where SVES has a formaltie-up, is important. The topuniversities offer courses in Python, Data Analytics, AI & ML, and Cyber Security and allow you to be certified. Companies will recognize these efforts at the time of hiring, and make SVES students stand taller!

Wish you and family to continue to be safe and happy! Together we will punch through this pandemic.
